

1 4 beam splitter with round head

We offer flexible orders, fast delivery, and comprehensive Fiber Optic Splitter 1×4 solutions with excellent quality and attractive pricing. Simplify project procurement with our one-stop solution, top ...

Large beam size, multi mirror optical set up with small power light source and supports high power laser light splitting. Polarization at 45 degree (AOI) or circle polarization light with no power loss detected. ...

Thorlabs offers a wide range of optical beamsplitters. Our plate beamsplitters have a coated front surface that determines the beam splitting ratio while the back surface is wedged and AR coated in ...

Dichroic Beamsplitters, which split light by wavelength, are often used as laser beam combiners or as broadband hot or cold mirrors. Non-Polarizing Beamsplitters, ideal for laser beam manipulation, split ...

Explore our collection of optical cable splitters and PON splitters for sale. Optical beam splitters are used to split the fiber optic light evenly into several parts at specific ratios.

Both 1XN and 2XN splitters can be constructed in this fashion with as many as eight or more outputs, with both low return losses and low insertion losses. This design is extremely flexible, allowing one to ...

CommScope offers a portfolio of bare and connectorized splitters/couplers in a wide range of styles and split ratios, and splitter modules for inside plant (ISP) and outside plant (OSP) applications that help ...

The optic holder is designed to be compatible with all standard round beam splitter optics. Common uses include beam sampling, system redundancy, and directing a portion of the beam to diagnostics ...

Custom beam splitters for lasers, photonics, and imaging. Plate, cube, polarizing, and dichroic tailored to your wavelength and specs.

Our beam splitters are made from high grade glass material with laser grade surface flatness & surface quality for tighter tolerance on the splitting ratio.
