

25 Self-drilling anchor bolt tail

Normet Self Drilling Anchors can be used for both temporary and permanent applications in mining, tunnelling and civil construction projects. In squeezing ...

The Self-Drilling Anchor (SDA) System is an advanced anchoring solution engineered for tunneling and ground engineering applications. This innovative system combines drilling, anchoring, and grouting ...

R25 anchor bolt is an advanced anchor bolt which can ensure the anchoring effect for complex ground conditions. It can be integrated with the functions of drilling, grouting and anchoring to provide higher ...

Normet Self Drilling Anchors can be used for both temporary and permanent applications in mining, tunnelling and civil construction projects. In squeezing ground or seismically active ground ...

Drill with high penetrating power. R25 self drilling anchor bolt is adopted superior carbon structural seamless steel tube, perfect superficial thread and delicate accessories, it can indeed realize drilling, ...

R25 anchor bolt is one of the R-thread self-drilling anchor bolt. It is composed by hollow anchor bar, anchor nut, anchor plate, anchor coupler, drill bit, centralizer, and the hollow anchor bars can be cut ...

Self drilling anchor system is a type of ground anchor used to provide stability in soil or rock formations. For application in soil nailing, rock bolting, micro-pipling, tunneling, mining and infrastructure.

Product Description. Unidrill provide a full range of R-thread and T-thread self-drilling anchor system: (1) R-thread/ R25, R32, R38, R51. (2) T-thread/ T30, T40, T52, T73, T76. Specifications of Unidrill's R25 ...

Choose from our selection of self-drilling anchors, including female drilling anchors, zinc alloy drilling toggle bolts, and more. Same and Next Day Delivery.

R thread self-drilling anchor bolt is suitable for broken rock, loose soil, and conditions that are difficult to drill holes, such as fracture zones, decayed rock, gravel, sandy gravel, and backfill ground.

With a 25 mm outer diameter and high-strength threading, the anchor bar allows simultaneous drilling and grouting, making it ideal for lighter loads and soil-nailing applications.
