

300 meters of 8-core single-mode fiber

Corning FREEDM®; One riser cables are flame-retardant, UV-resistant, indoor/outdoor cables designed for aerial and duct applications with no need for a transition splice when entering the building.

Discover the cost of fiber optic cable in this pricing guide. Learn material prices, installation factors, and what impacts total project costs overall.

This singlemode fiber supports 10Gbase-L and 10Gbase-E standards. It provides the high-bandwidth capabilities necessary for connecting data centers and establishing secure communications in ...

Engineered for field professionals and emergency response teams, this single-mode 8-core fiber optic cable delivers dependable performance under tension. The armored jacket enhances durability, ...

Experience unrivaled performance with G300 Series 8-core TPU Single-mode Heavy-duty Armored Fiber Optic Cable online, featuring ultimate protection and efficiency.

OM1 multimode fiber optic cables have a core diameter of 62.5 microns, which allows them to transmit data over distances of up to 300 meters at a speed of 10 gigabits per second (Gbps).

Thorlabs" SM1950 fiber enables single mode transmission from 1850 - 2200 nm. This fiber features a Ge-doped silica core surrounded by a pure silica cladding and a UV-cured acrylate coating.

This singlemode fiber supports 10Gbase-L and 10Gbase-E standards. It provides ...

After a PSP moisture barrier is applied around the cable core, this part of cable accompanied with the stranded wires as the supporting part are completed with a PE sheath to be a figure-8 structure. This ...

Single Mode Pre-terminated Fiber Optic Cable Pre-made cable, no need for field termination, plug and play, enables quick fiber termination to get fiber optic network.

This category of fiber cables has a loose tube fiber single, interlocking armored and dielectric options available. In addition, we offer tight buffered fiber cables that are made so that the buffering material ...
