

485 Fiber Optic Communication Cable

The DL485 and DL485-4W fiber optic systems serve as vital components for connecting field bus systems with RS485 interfaces, enabling safe and reliable data transfer in industrial applications.

Our RS-485 to Singlemode Fiber Optic Converter (rdc485SFO) robustly connects your panel mounted RS-485 devices to fiber optic cables up to 20km long, providing the ultimate in isolation, surge, and ...

An RS485 to fiber optic converter is a communication device that translates RS485 serial signals into optical signals for transmission through fiber optic cables.

Connect and isolate two- or four-wire EIA-485 network segments with hardware flow control using fiber-optic cable. The Firmware IDs for older versions of the firmware can typically be found in Appendix A ...

User connections are the two fiber ports, a 3 position removable screw terminal ...

The RLH Serial Data Fiber Optic Converter transmits RS-232/422/485 serial data over fiber optic cable. It transmits simultaneously to each serial port, providing the option to interface between one of three ...

The serial to fiber optic converter supports asynchronous serial RS232 or RS485 or RS422 communications through fiber optic bi-directional links. Operates reliably from 300 to 128K baud.

The PSI-MOS-RS485W2/FO 850 E can be used to convert RS485 2-wire devices to fiber optics. By transmitting serial data over optical fiber, these serial to fiber converters provide an economical path ...

User connections are the two fiber ports, a 3 position removable screw terminal strip for the RS485 port, and a terminal strip and barrel connector for the input power. Accessories available are an enclosure, ...

Rugged industrial-grade RS232 / RS485 / RS422 to fiber optic converter. Transmits serial data (RS232, RS485 or RS422) over long distances through fiber links (multi-mode: 3 miles or 5 km).

Power to operate the Model 276A is supplied by a small, wall-mounted transformer and line cord.

485 Fiber Optic Communication Cable
