

# African Bridge Optical Cable

A new digital highway is taking shape beneath the Mediterranean Sea, one that will physically connect North Africa to Europe with high-speed fibre optic cables and help close the digital ...

This interactive submarine cable map shows global undersea and underwater fiber optic cables connecting continents and countries worldwide. Explore cable routes, landing stations, system status ...

TeleGeography's comprehensive and regularly updated interactive map of the world's major submarine cable systems and landing stations.

This cross-continental submarine optical cable project covers Africa, Europe and Asia, with a total length of more than 45,000 kilometers and a total of 46 landing sites. The project aims to ...

With 12,000 kilometres of fibre-optic cables, the first of its kind backbone will span Central, Eastern, and Southern Africa, close regional "missing links" and address the quality, speed, and cost-effectiveness ...

The Medusa submarine cable project boasts a total investment of EUR342 million. The cable project is partly funded by the European Union. It will connect Cyprus, Greece, France, Portugal, ...

Though tech giants have invested heavily in high-performance digital infrastructure -- more cell towers, faster networks -- Africans across the continent still grapple with sluggish internet ...

Project BRIDGE is the establishment of a Special Purpose Vehicle (SPV) aimed at deploying at least 90,000 km of Fiber Optic cables as Nigeria's core connectivity ...

Building 2Africa required us to push the boundaries of subsea infrastructure. This cable is double the capacity of older systems. It incorporates undersea optical wavelength switching, enabling flexible ...

Project BRIDGE is the establishment of a Special Purpose Vehicle (SPV) aimed at deploying at least 90,000 km of Fiber Optic cables as Nigeria's core connectivity Infrastructure and national backbone ...

Kenya was the first East African country to welcome its first ever fiber optic cable and unveiled a sixth submarine internet cable that promises to offer higher speeds, lower latency, and ...
