Aggregation Switch 40G

Small data centers typically use a single switch as the aggregation switch for several racks. Most available top-of-rack (ToR) 40GbE switches use four ports of 40GbE as the uplink toward ...

FS 40Gb Switches offer high bandwidth, network virtualization, and redundancy, ensuring efficient deployment for campus core and distributed networks.

Experience the QSFPTEK S7600-24X2Q, a Layer 3+ aggregation switch. Each QSFP+ port splits into 4x 10G, providing adaptable 10G and 40G fiber links. Ideal for hyper-converged ...

MES5448 switches are high performance devices with 10GBASE-R and 40GBASE-SR4/LR4 interfaces that can be used as aggregation or transport switches in carrier networks and as Top-of-Rack or End ...

The ECS5520 series consists of two switches with sixteen 10GbE SFP+ ports or 10GBASE-T ports and two 40GbE uplink ports. The switches are designed for carrier/enterprise aggregation or small data ...

Experience the QSFPTEK S7600-24X2Q, a Layer 3+ aggregation ...

Designed with up to 1.44 Tbps of simultaneous high throughput, high port density, ...

The MS450 aggregation switch features twelve 40G fiber ports (QSFP+) and two 100G (QSFP28) fiber uplink ports. The switch is designed to meet the needs of high bandwidth, multi-gigabit switching and ...

Choose from 2*40G ports, 4*10G ports, or a combination of 1*40G+1*100G ports on its expansion modules. This flexibility empowers your network infrastructure to adapt seamlessly to various ...

The Cisco Meraki 425 series extends cloud management across the aggregation layer for medium-size networks with our 10/40G fiber aggregation switches.

1.8 Tbps high-density 100G/25G Layer 3 Etherlighting(TM) aggregation switch with MC-LAG support for high availability system design.

Designed with up to 1.44 Tbps of simultaneous high throughput, high port density, and ultra-low latency to accommodate scale and requirements. Ideal as aggregation switches in enterprise environments, ...
