

# Albania Butterfly Drop Cable G 654

Design and special properties o Light, thin and particularly robust cable o Cable for direct burial, in applications with high mechanical loads and in areas with rodents o Stranded minibundle (loose tube) ...

Butterfly Drop Cable featuring central fiber core with dual side strength members and LSZH sheath. Perfect for FTTH drop wiring and indoor/outdoor telecom links.

FTTH Armored Butterfly Drop Cable features dual central fibers, parallel strength members, aluminum armor, and water-blocking tape for durable FTTH deployments in duct, or harsh environments.

The cable features a central optical fiber unit, two parallel strength members on either side, and an additional stranded steel wire for enhanced tensile support. This robust structure is then completed ...

Self-supporting Butterfly Drop Cable with central fiber core and dual strength members. Ideal for FTTH, aerial/duct installations, and harsh environments.

Abalone Tech's Armored Butterfly Drop Cable is designed for demanding duct installations in FTTH and telecom networks.

The table below illustrates the differences in the characteristics of single-mode fiber optic cables based on G.654.A, G.654.B, G.654.C, G.654.D, and G.654.E standards.

Self-supporting Butterfly drop cable Cable Design Technical data

CommScope designs and manufactures a comprehensive line of fiber optic drop cables

The cable acts as a mechanical and environmental shield, protecting the fibre from stress, moisture, temperature changes, and other hazards encountered over its service life.
