

The development of distributed generation, from producers such as small hydropower plants, photovoltaic parks, wind farms, geothermal energy and energy storage bring a better performance of ...

No matter for urban or rural electrical grid, we provide you the right choices with just enough functions in low-voltage power distribution products and electrical installation technologies.

From substation to meter, our DA technology integrates seamlessly with existing distribution systems and ensures reliable and real-time, two-way communication. It works with legacy systems, industry ...

Electricity distribution system includes all network elements at voltage levels of 35, 20, 10, 6, and 0.4 kV, as well as substations that transform from 110 kV to them.

Actually there are no market power mitigation measures put in place in Albania. In other words, all generators can submit offers at any price up to the maximum price allowed in the markets (including ...

SEA Consulting has carried out an assessment of the concentration of the electricity production market in Albania by calculating the 3 most widely used indicators:

PDF | On Jan 1, 2015, Anni Dasho and others published MyAvis and Converge Applications a better Meter-Management System for the Albanian Power Distribution System (OSHEE) | Find, read and...

The development of smart grids, which use digital technology to monitor and manage the transmission and distribution of electricity, is key to efficiently integrating renewable energy sources.

ABB, the power and automation technology group, has signed a \$20 million contract with the operator of Albania's electricity transmission network for a system that will improve the reliability of the grid by ...
