

Anti-static flooring and cable trays for rail transit resistant to electrostatic tracking

Discover industry-leading electrostatic discharge flooring systems offering superior static protection, durability, and compliance for sensitive electronic environments.

StaticWorx telecom flooring maintains grounding continuity across raised floors and cable pathways while meeting ATIS 0600321 electrical performance requirements.

The exclusive four-part system comprised of tile, adhesive, copper grounding strips, and polish, works together to dissipate electrostatic charges, protecting people and preventing damage to expensive ...

Sika's ESD flooring systems protect sensitive electronics from static electricity, ensuring safety in industries with explosive atmospheres or delicate equipment.

Our complete solution includes primers, coatings, and self-leveling floor systems that integrate seamlessly, forming a resilient, static-safe envelope for your facility.

Protective Industrial Polymers" static dissipative flooring systems are engineered to maintain optimal electrical resistance, making sure your workplace is safe and reliable.

Meets or exceeds all industry standards for static control. Controls a broad range of static problems; nuisance shocks to catastrophic failure of electronic components and equipment.

Pre-packaged ESD floor mat kits for quick and reliable protection from electro static discharge.

ACL features a complete line of static dissipative floor products and finishes to provide maximum static protection in the workplace.

Stonshield ESD is a textured, static-dissipative flooring system designed to control electrostatic discharge. Ideal for environments where ESD protection is crucial.
