

Automatic Fiber Channel Switching

Looking for fiber channel switches for high-speed connectivity in data centers? Choose from top brands like Cisco, Brocade, Dell, HP and Juniper for reliable data storage and retrieval.

Scale and performance: This fixed form-factor switch supports the performance and scale required to deploy a dedicated and standalone Fibre Channel SAN connecting both initiators and ...

A fibre-channel switch supports many different configurations. The ports on the switch must be configured appropriately for the type of SAN that is set up and for the attributes of the SAN.

The unit offers three types of switching 1x2, 2x1, or 2x2. The remote switching ability is very useful for managed systems. A front panel LCD provides system status and provides a means of programing ...

XENOptics automatsd fiber switching lets telecom operators reroute traffic in seconds with remote NMS control, automatic failover and OPEX-cutting, truck-roll-free upkeep.

Fiber channel switching refers to using switches to build a switched fabric topology that intelligently networks storage devices for faster, more efficient data transfer.

This option is supported only on Fibre Channel (FC) interfaces configured in F-mode. It can be configured regardless of interface speed but will only be applied during link negotiation at 32 ...

Scale and performance: This fixed form-factor switch supports the performance and scale required to deploy a dedicated and standalone Fibre Channel SAN connecting both initiators and targets without ...

The HPE SN6000B Fibre Channel Switch meets the demands of hyper-scale, private cloud storage environments by delivering market-leading 16 Gb Fibre Channel technology and ...

The unit offers three types of switching 1x2, 2x1, or 2x2. The remote switching ...

We produce a wide range of turn-key fiberoptic switch systems that integrate fiber components with electronics, firmware, with all computer/internet interface formats having user-friendly graphics ...
