

Automatic Packaging Production Line for Optical Modules

Our automated Solar/PV modules production line includes a ...

Finetech has supported Convergent Photonics in the development of powerful multi-emitter modules right from the start and has helped them to successfully bring the assembly process into production ...

To attain both of low cost and high productivity, we developed passive alignment technique and optical coupling structure that is suitable for automatic assembly. We also developed ...

Discover HOPP micro-optical packaging technology for ultra-compact optical modules with micron-level precision and extreme durability.

iPronics is unveiling a dedicated manufacturing line for the packaging, assembly, testing, and qualification of its ONE Series SiPh OCS, enabling volume production from wafers to line cards ...

The proposed pigtail module eliminates ceramic parts and facilitates mass production of the components. An optic fiber (including a jacket) was placed into a ferrule sleeve. The optic fiber ...

Manufacturer and integrator of automated packaging systems -- filling, capping, sealing, conveying, and end-of-line. From a single machine to a complete turnkey line, engineered for your product and your ...

ASSEMBLYLINE Automated die-level photonic device assembly Fully automated passive/active photonic device assembly Designed for all optical element, fiber and chip assembly tasks ...

*Handling from Sorting to Packaging Line: Completed by AGV.

Our automated Solar/PV modules production line includes a complete set of equipment, such as solar cells laser cutting, string soldering, welding, glass loading, layup, laminating, framing, J-Box ...
