Draw the cable tray by setting an offset and defining the path of the tray. The cable tray type parameters control what fittings are used at elbows, tees, and vertical segments when you change the offset.

Specifies an offset between where you click in the drawing area and where the cable tray is drawn. This option is helpful when placing cable tray at a fixed distance from another component in a view.

For Ducts and Cable Trays the Offset should follow the Vertical Justification. For Example, if you draw a Cable Tray with the vertikal justification "Bottom"; and an offset of 23cm, the offset ...
