

Brightness Comparison of Fiberglass Luminous Floating Tail

Fishhook-Free Self-Standing Bite Indicator with Color-Changing Running Lead, Luminous Float for Day and Night Use, Electronic Float Specifically for Large Fish, Bluefish Float

Draw on experiences of sailplane designers in pursuit of higher aerodynamic performance. Review several feature of current sailplanes that might be of wider use. Review the future for the recreational ...

The fiber glass tail is transparent, which can guide light smoothly, and it have small light loss. The fiber glass material is well selected, which have a very good quality, good flexibility, strong and durable for ...

To choose the best floating fishing light for your needs, take into account several important factors. Brightness is key--lights with higher lumens offer better visibility and are more ...

Different floating pool lights put off different levels of brightness and you'll need to decide whether or not that's important to you. Fiber optic lights, for example, are usually very dim and give ...

Water shadowless tail principle: The water shadowless tail mainly uses the principle of secondary refraction of light to directly refract underwater light and shadow back to the water. the fishermen see ...

Model 3 (3 LED lights): Tail Length: 8.5 inches (21.5 cm), Tail Diameter: 0.05 inches (1.2 mm), Outer Diameter: 0.2 inches (5.2 mm), Inner Diameter: 0.2 inches (4.0 mm).

An occulting light is a rhythmic light in which the duration of light in each period is longer than the total duration of darkness. In other words, it is the opposite to a flashing light where the total duration of ...

The water shadowless casing and optical fiber floating tail are materials for making digital floating tails. Our fiber has high light conductivity and low light loss, making it an ideal material for making ...
