

Cable tray embedded floor slab

A cable management system for ceilings and raised access floors is designed to elevate from ceiling tiles or floor slab, horizontally distribute, and manage low voltage cables.

Access what you need now and make changes down the road in any open space. Ideal for new construction. Innovative cable management for the modern world. Reduce risk, accelerate project ...

It supports coordinated routing beneath raised floors, integrates mechanical and electrical requirements, and provides the physical foundation for scalable, serviceable, and resilient digital ...

Cable Trays can be located just inches below the finished floor for easy access, so making changes or repairs isn't a back breaking, time consuming job. Create organized cable channels with Cable Tray ...

Three piece vault configurations typically consist of a slab section, a riser section, and a lid section for applications requiring non-confined access where the project calls for a minimum component weight ...

A cable management system for ceilings and raised access floors is designed to elevate from ceiling tiles or floor slab, horizontally distribute, and manage low ...

Secure L-type brackets to the floor slab and attach cable tray to the brackets, so that the cable-tray system is lifted and supported above other underfloor utilities.

Simply lift the floor panels and install Snake Canyon basket tray segments in a matter of seconds to create a bonded cable pathway safely separated from under floor HVAC ductwork and ...

Underfloor cable trays are perfect solution for running large quantities of power or data cables in underfloor and these trays are designed to both route and provide support for vital wiring and cable ...

Place them over existing cable to prevent damage and reduce tripping hazards. All have a textured surface to improve traction. They're also weather and abrasion resistant. Snap together as many of ...

Cable trays keep wires in place while allowing air flow in raised access floor systems. Our system installs in seconds without tools. Ideal for data centers.
