

Customized by Western European Micro-Module Manufacturers

Other prototypes have been designed at L-, S-, C- bands using both GaAs and GaN technologies. Our developed IP in high power amplification modules allows us to rapidly develop highly customized ...

All thermoelectric modules and related products are designed and developed in our ISO 9001:2015 certified facility in Berlin, Germany.

Rendering high-density, first-rate, precise, and error-free PCB assembly, testing, and enclosure assembly services with an in-house automatic optical inspection (AOI) ...

Products from TDK Electronics include Capacitors, Nonlinear Resistors, Ceramic Components, Sensors, Sensor Systems, Inductors (Coils), Transformers, EMC Components, Ferrites and accessories as well ...

Ferrotec Nord manufactures more than 250 types of Peltier modules of various design, capacity, voltage, supply current and geometry to meet the demand of the thermoelectric module market and specific ...

Customized Microelectronics Welcome to Microdul--your specialized EMS (Electronics Manufacturing Services) provider for cutting-edge miniaturized electronics. We manufacture sophisticated electronic ...

Through intimate collaboration with our teams and diverse manufacturing expertise, we deliver customfit IC modules or end-products to our customers, using low ...

Wellen Technology Co.,Ltd. is a professional manufacturer of thermoelectric products. Our main products include: thermoelectric modules, thermoelectric cooling assemblies, thermoelectric ...

Rendering high-density, first-rate, precise, and error-free PCB assembly, testing, and enclosure assembly services with an in-house automatic optical inspection (AOI) system and modern ...

WellenTech focuses on the research and manufacturing of high quality thermoelectric ingots, modules and assemblies for cooling and converting heat into electricity. The company is awarded the quality ...

Through intimate collaboration with our teams and diverse manufacturing expertise, we deliver customfit IC modules or end-products to our customers, using low-power analog and digital design techniques ...

Our suppliers and customers are companies from different countries of the world: Germany, France, Spain,USA, Canada, China, Singapore, Japan, etc. Our company is working in the world market ...
