Direct-buried non-metallic optical cable

The direct-buried fiber optic cables allow underground laying without usage of additional pipes. The cables stand up with added mechanical protection, ...

Designed to meet the demands of today"s data-intensive world, these cables are comprised of multiple optical fibers bundles in a flat ribbon format that is high density, lightweight, and durable.

Armored fiber optic cables for underground installation with UV and temperature resistance.

PTCL Cables offers Non-Metallic Direct Buried Optical Fiber Cables which also called anti-rodent has been popular cabling solution as its construction design helps to avoid Radio frequency interference ...

Rodent protected non-metallic optical fibre cable for direct buried installation. Suitable also for duct installation by pulling. Stranded optical fibre cable for challenging conditions. Nestor Cables is a ...

Direct buried fiber optic cable is a type of fiber optic cable that is designed to be installed directly underground without additional protective conduits. Direct buried fiber optic cable has multiple layers ...

The direct-buried fiber optic cables allow underground laying without usage of additional pipes. The cables stand up with added mechanical protection, moisture resistance, and ...

The Optical fibers are housed in loose tubes that are made up of high-modulus plastic and filled with thixotropic jelly. The tubes (and fillers) are stranded around the central strength member to form a ...

Our cables are gel-free, easy to strip, and built to handle the environmental challenges of underground applications to simplify installation. No matter how deep your fiber optic cable needs to be buried, our ...

Direct burial fiber optic cables manufactured by VERI Cables are usually designed to achieve waterproof performance through multiple layers of protection, including waterproof coatings, moisture and water ...

These corrugated steel tape and aluminum tape armored and double sheath cables are suitable for installation in harsh environments where mechanical impact on the cable is to be expected.e.g. in ...
