

# Fesfp optical module

The difference between them is that eSFP has some additional functions than SFP. For example, eSFP optical modules support optical power monitoring, while traditional SFP optical ...

Enhanced SFP (eSFP) optical module: supports monitoring of voltage, temperature, bias current, transmit power, and receive power. Currently, eSFP and SFP optical modules are both called SFP ...

Originally designed to replace single-channel SFPs with high-density optical modules, the QSFP is only 30% larger than a standard SFP module. The device supports rates from 100Mbps to ...

This document provides an overall description of the CE12800 series switches hardware, helping you obtain detailed information about each chassis, power module, fan module, card, cable, and ...

FE SFP/eSFP Optical Modules S-SFP-FE-LH40-SM1310 S-SFP-FE-LH80-SM1550  
SFP-FE-LX-SM1310-BIDI SFP-FE-LX-SM1550-BIDI SFP-FE-SX-MM1310 eSFP-FE-LX-SM1310 ...

An eSFP module is an SFP module that supports monitoring of voltage, temperature, bias current, transmit optical power, and receive optical power. Therefore, eSFP is also called SFP sometimes.

Description The ESFP transceivers are high performance, cost effective modules supporting multi-rate of 155Mbps~2.67Gbps and 80km transmission distance with SMF. The transceiver consists of three ...

The eSFP and SFP optical modules have the same functions and services. They can substitute for each other as long as they have the same optical power, sensitivity, and transmission distance.

Huawei S series devices support optical modules of the following encapsulation types: CFP, QSFP+, QSFP28, XFP, SFP, eSFP, and SFP+. All optical modules are hot swappable.
