

Fiber Optic Sensor Corrosion Detection Report

Paper presented at the AMPP Annual Conference + Expo, Nashville, Tennessee, USA, April 2025. This paper describes a disruptive continuous monitoring system to detect Corrosion ...

This study investigates the feasibility of distributed fiber optic sensor for corrosion monitoring of steel bars embedded in concrete. Two sensor installation methods are compared: (1) ...

We report experimental results and subsequent field test, using fiber optic AE sensor. Our study attempts to detect and evaluate outer piping corrosion under insulation material. Such corrosion is ...

This paper presents a distributed monitoring approach for detection, visualization, quantification, and warning for pipe corrosion using a single-mode telecommunication-grade fiber optic cable as a ...

We report herein on its experimental results and fiber-optical AE sensor with calibration data (frequency response etc). Our study is how to detect and evaluate outer piping corrosion under insulation ...

Corrosion Detection Using Metal Coatings On Fiber Optic Sensors by Paul M. Schindler Thesis submitted to the Faculty of the Virginia Polytechnic Institute and State University
