

Fiber optic cable along the trunking box

Our pre-assembled MPO female trunk cable tackles high-density data center network connections and combines multiple fiber optic lines into a single, easy-to-manage cable.

Fiber-optic cables are routed from the street to your house via an underground conduit or aerial lines, connecting to an Optical Network Terminal.

Leviton fiber trunks are pre-terminated cable assemblies, and are ideally deployed in data centers and enterprise fiber networks.

EDGE(TM) MTP™ trunks provide the backbone of the EDGE solution. With non-pinned MTP connectors on both ends, these fiber trunk cable assemblies are designed to interface with the EDGE solutions or ...

Discover the various types of fiber optic trunk cable available, including different connectors and configurations to suit your specific needs.

Our dedicated fiber optic facility ensures our assemblies are tested to the highest industry standards. Contact us to learn how our Quick Turn Ordering program can help with your fiber deployment.

Rosenberger OSI introduced high-fiber-count factory assembled fiber optic trunk cables based on loose tube indoor, universal and outdoor cables to the market in 1991.

T024L9PB1B1T16N150E - 24-fiber Low Loss SM assembly with a plenum jacket and LC to LC 2 mm connectors with a 16 in break; configured to be 150 feet in length and delivered in 5 days.

A trunk cable is a pre-terminated fiber or copper cable that combines multiple individual cables into a single bundled unit. It's built to carry multiple data channels between key infrastructure points.

Our fiber optic trunk cables provide high density connections to patch panels, cassettes or cable harnesses. Order a single or multi mode cord online today!
