

Fiber optic cable brands starting with y

Y.C. Cable is a build-to-print cable assembly manufacturer. We produce strictly according to your engineering drawings, BOMs, and specifications -- ensuring consistency, traceability, and quality ...

Y-cables, which convert one duplex connector into two duplex ...

MPO Y splitter cables are used to distribute signals from a single output to multiple outputs. They can be used to double the 400G to 200G termination on a 12-pole MPO link.

The iFiber Y is designed with a "Y" shape of both USB A and C at the ...

Profitap's LC Y-cables feature one duplex connector on one end (for the TAP output), and two duplex connectors on the other end (for the transceivers input), set up such that the signal will always be fed ...

This cable features a specially formulated low-friction PE jacket material optimized for jetting performance into duct systems. The cable construction leverages Corning's Flow Ribbon Technology ...

Our portfolio of fiber optic cable assemblies are available in fiber optic cable (FOCAB) ODC and OFNR cable types. Choose your needed cable assembly fiber diameter and outside cable diameter, ...

Stonewall Cable manufactures Fiber "Y" cables for many different applications. We can cross-reference most OEM part numbers as well as construct "Y" cables for custom applications.

The iFiber Y is designed with a "Y" shape of both USB A and C at the host head. To join or host a video meeting, simply plug the iconic Y connector into any laptop with an either Type A or Type C port, ...

TLC Micro-Distribution cable combines high fiber counts with a compact, space saving design. 2 to 12 colored bare fibers with aramid yarn are positioned in a 3 mm jacket. 6 tubes of 12 fibers are ...

We are capable of providing customers with a variety of standard and customized Y-shaped optical fibers to meet the diverse applications of split fibers in universities, research institutions, and ...

Y-cables, which convert one duplex connector into two duplex connectors, are designed to feed light exclusively into the receive side of the transceivers.
