

Explore research that advances our understanding of human aging and the fundamental link with age-related diseases. Frontiers in Aging Neuroscience is the most cited journal in the field of geriatrics ...

Imagine a world where the Internet doesn't just connect but senses--detecting earthquakes, monitoring battery health, or safeguarding ...

Imagine a world where the Internet doesn't just connect but senses--detecting earthquakes, monitoring battery health, or safeguarding critical infrastructure. This is the power of ...

Geotechnical engineers are warming up to a new-to-them technology, distributed fiber optic sensing (DFOS), which provides an unprecedented level of quantitative infrastructure ...

A new documentary hosted by CNBC shines a spotlight on Frontiers' mission to make science open -- and the powerful role this approach plays in accelerating breakthroughs across ...

Abstract This perspective article delves into the current performance limitations of distributed optical fiber sensors and proposes avenues for future advancements, as envisioned by ...

The latest applications and technological developments in the field of optical fiber sensors will be shared through this special issue. We invite researchers and investigators to contribute their original ...

Embodying surgical robots with next-gen AI can safely augment practice if ethical and regulatory questions are addressed, say experts writing today in Frontiers in Science.

Our aim is to bring all relevant Specialties in Frontiers || together on a single platform.

Frontiers is a leading open access publisher, revolutionizing scientific communication with AI-powered peer review, rapid publication, and global reach across all major research disciplines.

This Research Topic aims to bring together contributions that advance fiber-optic sensing technologies specifically for structural sensing, control, and asset ...

Brief theory of sensing principle, fabrication method, applications, advantages and disadvantages of the different fiber-optic sensors, are addressed. Recent progress in numerous ...

Universidad Polit&#233;cnica de Madrid (UPM) has joined Loop as our first institutional partner. Researchers in the UPM observatory are able to link their institutional profile to Loop. Their Loop profile appears ...

# Frontiers in Fiber Optic Sensing

Explore open access research in science, spanning multidisciplinary advances that shape understanding of nature, technology and society.
