

Grille Distribution Box Switch

You're swapping out your RV's AC and need a distribution box to match. Open the louvers for cool air directed straight into the cabin, or close them to push air through existing ducts.

It serves as the interface between a rooftop air conditioner and the interior of the RV, allowing cool (or warm) air to be distributed directly into the living space without the use of air ducts.

Find out more about our grilles, registers, diffusers, terminal units, underfloor products, and other industry-leading air distribution products in the Tuttle & Bailey product handbook.

DELUXE CHILLGrille features Omni-directional louvers are designed to direct air conditioned air downwards into the RV interior in any direction. When the omni-directional louvers are closed, ...
