

Sensing and Non Destructive Test Products High-Definition Distributed FO Sensing ODiSI Interrogator
High-Definition Sensors ODiSI Software High-Speed Multipoint FO Sensing HYPERION Interrogators

For example, GaAs lasers or InP modulators, grown conventionally on native substrates, can be lifted and transferred onto silicon photonic circuits with submicron-precision alignment-- ...

To meet this need, we demonstrate a solution-processed optoelectronic fusion-upconversion device (OEF-UCD) that seamlessly integrates near-infrared detection with visible ...

Photoelectric fusion and silicon photonics technologies are key to building an all-photonics network. These technologies require high-precision processing to accurately guide light. ...

Contemporary advances in high-resolution instrumentation, sensor fusion, and data analytics now allow measurement precision below 1 nm, even under industrial conditions.

Signal fire fusion splicer AI-10A is the first fourth-generation optical fiber fusion splicer, it combines electric cleaver and fusion splicer as one, with 8-in-1 signal fire stripper.

In this study, we proposed an intelligent manufacturing technology roadmap based on the forecasting of the trends of new technologies, the identification of key enabling technologies, and the...

This pioneering approach, known as Advanced Lithographic Electroforming, combines the benefits of LDI and Electroforming to deliver high-precision metal components with unparalleled ...

This article discusses the design of a high-performance quasi-optical mode converter for the TE₃₃₁₂ T E 33 12 mode at 210 GHz. The conversion process is challenging due to a caustic-to-cavity radius ratio ...

Our comprehensive GaAs, InP-based III-V semiconductor laser diode design and manufacturing capabilities offer complete solutions where quality and reliability are paramount for aerospace and ...
