

Gyftzy Metal Optical Cable

The main application of the GYFTY fiber cable is for aerial or conduit use. It is located in the center of the cores as a non-metallic resistance element and is used in the high voltage area for long distance ...

The difference between GYFTZY optical cable and ADSS optical cable:GYFTZY optical cable mainly refers to non-metallic optical cable, which has the characteristics of water blocking and flame ...

Shandong Inlink Optoelectronic Technology Co.,Ltd, is professional in fiber-optic cable for 20 years, covering OPGW,ADSS,Outdoor cable, etc.

Our corporation is a professional manufacturer of fiber optic cable and patch cord over 8 years, with ISO 9001:2015 certificate. OEM is available and we can design any kind of fiber optic cables for you.The ...

As shown in the table above, gyftzy optical cables are comprehensively superior to traditional models in key performance indicators and are the "safety first choice" in outdoor ...

Product Description The fibers are positioned in loose tubes that are made of high-modulus plastic and filled with tube gel. The tubes (and fillers) are stranded around a non-metallic central strength ...

The center of the cable core is a metal reinforced core, and for certain numbers of optical cables, a layer of polyethylene is extruded outside the metal reinforced core.

Pine layer twisted non-metal flame retardant optical cable GYFTZY (2-288 core) is a type of optical fiber cable used for long-distance telecommunications and data transmission. This cable is ...
