

With our modern production facility in Heerbrugg, we are able to meet the increasing requirements of the semiconductor industry. We operate cleanrooms of class ISO 5 (100) with very clean work zones ...

Optopax offers full-service OEM manufacturing for custom camera modules, with support for both chip-on-board (COB) and packaged image sensors, giving our clients the flexibility to balance ...

Our experts define the best manufacturing strategy for each project and develop customized processes for your requirements. Our expertise starts with a piece of glass and ends with the integration into ...

At OSE Optics, we specialize in delivering custom optical assembly solutions that meet the most demanding standards in a range of industries, including aerospace, defense, medical devices, ...

Together with globally renowned optical module manufacturers, find out how AT& S is empowering high-speed Optical Module PCB manufacturing to address the increasing demand.

With data centers transitioning to 400G and 800G optical modules for enhanced bandwidth efficiency, the demand for high-performance optical chips has surged by approximately 30% year-over-year.

To help you choose the best partner, this article will analyze and introduce 10 companies in the optical transceiver industry chain for you.

After more than 20 years of hard work, O-Net Technology has grown into the world's largest supplier of optical communication components, modules and subsystems, and has taken the lead in multiple ...

Optical components are vital to advanced applications in science, astronomy, lithography, and space exploration. TNO combines expertise with strong supplier partnerships to deliver specialised, high ...

Core high-end optical chips still rely on overseas suppliers such as Lumentum, II-VI, and Finisar. Domestic supply gradually supplements and collaborates, especially in VCSEL, DFB, and mid/low ...

High-end optical module manufacturing
