

Hot-swappable power distribution unit with high temperature resistance

The ICT MPS Ultra provides up to 12 kW of hot swappable, managed DC power for a broad range of communications and broadband applications. Available for 48, 24 or 12 volt DC applications, MPS ...

The monitoring system can effectively monitor power modules, communication power modules, inverters (UPS), AC/DC power distribution, etc., providing dry contact alarm, display, and acousto-optic alarm.

The Xtreme Power M90C is a drop-in replacement for Eaton BladeUPS, offering hot-swappable modular design, unity power factor, higher energy efficiency, and complete scalability from 5kVA to 60kVA.

SmartOnline hot-swappable modular UPS systems feature a modular power distribution unit (PDU) that combines all input and output power connections with a manual bypass switch. Facility personnel ...

The HotSwap Maintenance Bypass (MBP) unit enables easy UPS replacement without interruption of the load. The HotSwap MBP is ideal when exchanging a unit or servicing a UPS.

Hot-swappable power management & protection solutions from STMicroelectronics and KEMET keep systems operating in order to maximize productivity and minimize downtime.

Bi-stable latching relays significantly reduce idle power draw. TAA compliant. Upgradeable and Hot-Swappable monitoring device. Local and remote power monitoring with accuracy of +/- 1% (ANSI & ...

The SOETECK Precision Power Distribution Cabinet with Hot-Swappable Design offers a comprehensive power management solution that supports stable and efficient electrical distribution ...

Bi-stable latching relays significantly reduce idle power ...

The TCD-HS SERIES Hot Swap Power Supply is available in a ruggedized "COTS" version for military applications. Custom configurations and other voltages and power levels are available.

Packaged as a single module unit or within a complex system, the P600 meets your application's demands. The broad range of controls and options fits virtually any DC backup specification while ...

Hot-swappable power distribution unit with high temperature resistance
