

Huawei invests in optical modules

To tackle these challenges, Huawei has launched its StarryLink optical modules for data center networks, featuring three robust capabilities: spanning, stable, and secure, delivering a "3S" ...

Huawei offers a comprehensive portfolio of pluggable StarryLink optical modules for data center networks, with various models providing flexible plug-and-play solutions tailored to diverse interface ...

Looking ahead, Huawei aims to collaborate with industry partners to further research and innovate in data center network optical modules, promoting intelligent network upgrades and ...

In the optical transmission domain, Huawei has released Next Generation OTN products for OTN backbone, OTN optical layer, and OTN metro networks, helping operators build Agentic ...

Against this backdrop, Huawei is expanding its photonics ecosystem through in-house chip development, capital investment, and global talent recruitment.

6. Conclusion Huawei is both a producer of optical modules and a developer of optical chips, but its public identity is stronger in optical modules, as these are the end products deployed worldwide. Its ...

The StarryLink optical module is a core component developed by Huawei for data center networks. It delivers ultra-long-distance transmission, exceptional reliability, and enhanced security, ...

At the Mobile World Congress 2025 (MWC 2025), Huawei launched the StarryLink optical modules, designed to enhance network experiences with "3S" quality (Spanning, Stable, Secure).
