

Inner heat shrink tubing of the ribbon-shaped fusion splice tray

Heat shrink sleeves provide a safe and efficient method for protecting fusion splices on either 250 or 900 micron coated fibers. Heat shrink sleeves are threaded on to fibers prior to fusion splicing and then ...

"Ribbon" fiber series fusion splice protection sleeve is designed to accommodate ...

Designed for for multiple fibers protect mass fusion splices of ribbons with one to twelve fibers,the length is 40mm Quick installation cycle,Shrink time about 90 seconds (Shrink times vary with heater style ...

"Ribbon" fiber series fusion splice protection sleeve is designed to accommodate 2 - 12 ribbon fiber. Stock lengths are 40mm, but are also available in a new 30mm length for smaller packaging ...

This product is made up of cross-linked polyolefin heat-shrinkable tubes, hot melt tubes, and ceramic rods. It is specifically designed to provide strength members and protection to fibre optical splices.

The 4-12F Ribbon Fiber Fusion Splice Sleeve is specifically designed for splicing and protecting ribbon fibers in high-density environments. Its unique design combines a ceramic rod, hot ...

Our dual strength member sleeve is designed to "sandwich" the ribbon, thus minimizing any undue stress on the fiber while maximizing fiber uniformity and retentivity.

Corning offers heat-shrink protection in both single-fiber and multifiber versions. The sleeve securely protects the fusion splice on either 250 or 900 µm coated fibers, while offering individual access to ...

AFL FP-05 S003027 Fusion Splice Sleeves (40mm in length) ensure durable and reliable protection of ribbon fiber splices with a fiber cleave length 10mm. They accommodate up to 12 fibers (250-micron ...

MASS 8 Fiber Ribbon Heat Shrink Protector For Fusion Splicer (Clear). Splice protectors are easy to apply and are designed to carry tensile, bending, and ...

All the types of protection allow individual fiber access in the splice tray. Corning offers heat-shrink protection in both single-fiber and multifiber versions.

MASS 8 Fiber Ribbon Heat Shrink Protector For Fusion Splicer (Clear). Splice protectors are easy to apply and are designed to carry tensile, bending, and torsional loads across the splice joint.
