

Irregularly shaped cable trays sealed in floor slabs

Cable trays keep wires in place while allowing air flow in raised access floor systems. Our system installs in seconds without tools. Ideal for data centers.

Inspect the cable trays, trunking & ladders installation routes as per approved shop drawing. Chalk lines are used to mark the cable tray route at the deck slab.

Cable trays and busways at floor level or at slab penetrations shall have a waterstop no less than 50 mm in height. At slab penetrations, provide ...

Place them over existing cable to prevent damage and reduce tripping hazards. All have a textured surface to improve traction. They're also weather and abrasion resistant. Snap together as many of ...

Explore all types of cable trays--ladder, perforated, basket, solid, and channel. Learn their uses, materials, pros, cons, and key differences.

Cable tray length is selected based on the load to be supported, the distance between the supports (also referred to as the span), and handling and installation constraints.

Three piece vault configurations typically consist of a slab section, a riser section, and a lid section for applications requiring non-confined access where the project calls for a minimum component weight ...

Cable trays and busways at floor level or at slab penetrations shall have a waterstop no less than 50 mm in height. At slab penetrations, provide 20-30 mm of firestopping and install a fire ...

The channel cable tray features a simple, U-shaped or channel-like structure that provides a compact and straightforward solution for supporting electrical cables.

The Ladder Tray features light, rugged, tubular steel construction. It is designed for mechanical support and strain relief in long runs of cable and creates a smooth gradual bend for cable. Rail and stringer ...

Core rules for selecting, installing, grounding, and filling cable trays--clearances, materials, separation, and bonding explained.

When fitting cable trays and their accessories, the products are cut on site to create changes of direction, adjust sections, etc. Damage can also occur during handling; as a result, both the ...
