

Is China Netcom fiber optic cable safe

As electrical professionals, most of us take fiber optic (FO) safety for granted. Since fiber optic cable carries no electricity, we don't worry about electrocution. Similarly, we don't think about ...

"Over the past year, I have worked with NETcom on several projects; they know what they are doing and have always delivered high-quality work. I highly recommend them for your business cabling or ...

Chinese-made telecommunication products have significantly impacted the fiber optics market, making it difficult for American fiber optical suppliers to compete. Additionally, there are inherent cybersecurity ...

The fiber optic cable industry in China has solidified its position as a global powerhouse, driving the expansion of high-speed networks, 5G infrastructure, and smart cities. As of November ...

Learn how fiber-optic internet protects your data from cyber threats. Explore the security advantages of fiber vs. cable, plus tips for safer online browsing.

This paper addresses how the United States and its allies can more strategically compete with Chinese and Russian threats to subsea cables and reduce the vulnerability of cable ...

The rise of the Chinese cable industry not only challenges the entrenched dominance of the U.S. and its allies but also highlights the difficulty in curbing China's progress.

I recently got new internet installed and my fiber modem is actually outside of my house, only covered with an unlocked plastic type of covering. I was told it's placed outside this way for easy ...

In 2008, the International Bureau issued a Public Notice of the pro forma transfers of control of the two international section 214 authorizations, ITC-214-20020728-00361 and ITC-214-20020724-00427, ...

While fiber optics eliminate electrical ignition sources, fiber cables still require proper safety measures in explosive atmospheres. The light transmitted through fiber, especially from high ...
