

## Jordan s long-span ladder-type cable trays

Refers to the approximate height of a cable tray used for specifying. Selecting a specific height will show cable trays with that height, as well as cable tray accessories compatible with that height.

Husky Ladder Cable Tray systems consists of two longitudinal side members connected by individual transverse members, and is designed for use as a power cable or control cable support system.

The Ladder Tray features light, rugged, tubular steel construction. It is designed for mechanical support and strain relief in long runs of cable and creates a smooth gradual bend for cable.

Our wind certification report provides you with list of acceptable B-Line series cable tray supports, fittings and covers based off of the environmental conditions, cable loading, and type of cable tray in your ...

Match the cable tray system to the environment: solid for full protection, perforated for ventilation, and ladder for heavy-duty long spans. Define tray width and side height by cable quantity, bending radius, ...

All trays (except 14A) and rungs are designed to handle cable loads plus 200 lbs. of concentrated load for any tray width. For example, strut rung #11118 can handle 489 lbs. at a 36".

Choose from our selection of ladder cable trays, including cable and hose trays, heavy duty open cable and hose carriers, and more. Same and Next Day Delivery.

Besides, FRP channel cable tray and FRP ladder type cable tray are also available with cover. For further security, covers are used where cable protection is required or desired.

This product line is designed for applications with extremely heavy loads and long spans. Tray systems are available in lengths of 30, 40 and 50 feet to accommodate 30-50 foot support spans.

The long-span cable tray adopts the structure of a strengthened side plate, which greatly increases the load capacity of the bridge. The product is suitable for the installation of long-span lines.
