

Embedded or integrated semiconductor optical modules are starting to gain traction, with the shipments of On-Board Optics (OBO), Near-Packaged Optics (NPO) and Co-Packaged Optics ...

800G modules drive optical market recovery in Q2 2025, with initial 1.6T shipments. This article highlights key trends in data center optics and AI infrastructure investment.

Embedded or integrated semiconductor optical modules are starting to gain traction, with the shipments of On-Board Optics (OBO), Near-Packaged ...

Optical Module Market surges as AI clusters expand, boosting demand for 800G and Coherent-lite modules and reshaping global cloud network infrastructure.

Carriers like Verizon and AT& T are accelerating fiber deployments, creating sustained demand for single-mode optical modules. However, supply chain constraints and component shortages continue ...

In summary, the surging demand for 800G and 1.6T optical modules--driven by AI computing clusters, hyperscale data centers, and next-generation cloud architectures--has positioned high-speed optical ...

Optimism ruled at CIOE this year, with vendors and operators eager to talk about the latest datacom speeds, emerging optical technologies, and the unique ways that China builds and ...

Nanoporous semiconductor platform targets ultra-short-reach optical I/O and intra-data-center optical interconnects for AI infrastructure.

Key Takeaways: Shares of optical module makers InnoLight and Eoptolink surged over 6% to new highs as 1.6T products enter commercial mass production. The global optical module ...

In addition to hosting a dedicated photonics market briefing, Scaling Datacom Optical Technologies for Next Generation Networks, and presenting the latest results, our team held ...

The upgrade cycle offers significant structural growth opportunities for Taiwan's optical communications supply chain. Taiwanese firms have established solid capabilities in foundry ...
