

The loose tube design provides stable performance over a wide temperature range and is compatible with any telecommunications-grade optical fiber. The cable design can span distances in excess of ...

AFL's ADSS (All-Dielectric Self-Supporting) fiber optic cable is designed for aerial installation without the need for messenger wire. Lightweight, non-metallic, and ...

Outdoor dry core (ADSS) optical fiber Multi Loose Tube cable with aramid yarns as strength member and polyethylene outer jacket. Product feature: This cable has all dielectric and self-supporting ...

While the concentric, self-supporting cable design allows easy, one-step installation using standard hardware and installation methods, the SZ-stranded, loose tube design isolates optical fibers from ...

The Fiber Optic Type ADSS (All-Dielectric Self-Supporting) Cable with a Single Sheath is engineered to excel in demanding applications, with a primary design focus on impressive spans of 100 to 200 ...

This cable incorporates innovative waterblocking materials, eliminating the need for traditional flooding compound and providing efficient and craft-friendly cable preparation.

This specification covers the construction and properties of Mini-ADSS (All Dielectric Self-Support), Outdoor, 3 Twisted-tube, Single Jacket, fiber optic cable for aerial and duct installation.

This type of cable does not need a messenger to support it, so it can be installed in a single pass. This cable construction does not contain any metallic elements so it is also non-conductive.

Liechtenstein ADSS Optical Cable OS2
