

Make a bridge using rope

Build a rope bridge over a creek by following the step-by-step instructions in this tutorial. If you're going to build a rope bridge, then it's important to have the right tools and materials.

Building a single rope bridge involves securely anchoring a static rope between two points and using a tensioning system, like a trucker's hitch, to create a taut line for crossing. This ...

If your kids love climbing, balancing, and pretending they're on a wild adventure, a swinging rope bridge is the ultimate backyard project. It looks impressive, but with some simple materials and a bit of time, ...

The best place to build the bridge is on flat ground between 2 anchors (trees) about 20 metres (60 feet) apart. I have used a telephone pole as an anchor and in a pinch you can create a holdfast (described ...

Make your own suspension rope bridge instructions, great for a camp out or scout night.

The skills, along with the lashing ropes and poles required to build a rope bridge using double A-frames for better stability, can be used time and again for a variety of pioneering projects and troop meeting ...

Welcome back to our Scotland Rope Bridge Build Series - Episode 3. This is where the structure takes shape and the artistry of rope bridge building comes alive.

The simplest rope bridge consists of a cable to stand on and a cable to hold onto with your hands. This design is quick and easy to build but can be tricky to walk along.

The challenge was to do as much as possible without the need of machinery or swimming. Even if your creek isn't that wide, consider flood stage and go from there. The drawing shows everything used to ...

If your kids love climbing, balancing, and pretending they're on a wild adventure, a swinging rope bridge is the ultimate backyard project. It looks impressive, but with ...

This guide will walk you through the exciting process of building a backyard rope bridge, adding a thrilling twist to your treehouse project. Planning Your Rope Bridge Adventure
