

Find efficient fiber optic trench digging machines for your projects. Durable, reliable, and designed for precision trenching. Perfect for pipeline and cable laying.

Tesmec trenchers are a clean and fast technology for in-line excavations for the installation of urban fiber optic networks (FTTx), suburban networks (city rings) and long-distance networks (backbone).

Easy access to all Ditch Witch service parts and manuals. Lay down fiber with minimal disruption to the surrounding area and speed up the microtrenching process with the MT12. Only from Ditch Witch.

What is Micro Trenching? MicroTrenching is the placement of reduced diameter MicroDuct pathways into the utility space with reduced impact on the existing infrastructure.

Complete microtrenching projects with the Vermeer reinstatement machine, a versatile tool for backfilling and reinstatement after conduit placement in fiber-optic and other utility installations.

The innovative and powerful Ditch Witch MT16 microtrencher delivers clean, precise cuts through asphalt or concrete, helping utility contractors install fibre-optic cable along paved rights-of-way with ...

The unit can be manually tilted 6 degrees to the right or left, helping operators maintain a true vertical trench on uneven surfaces. The MT12 is designed to hydraulically traverse 24 in (610 mm) from the ...

With the MT26, operators can create a clean, deep, narrow trench in one easy pass, and easily install cable deep enough to meet most requirements with minimal disruption to the surrounding infrastructure.

The TRENCH" edge Rotary Trencher can be the most cost effective way of installing fiber optic cable in the last 100 yards of (FTTH) fiber to the home. Our trenchers can cut trenches one (1") wide by ...

Easy access to all Ditch Witch service parts and manuals. Reduce cost-per-foot and install fiber optic cable fast with the MT26 Microtrencher, giving you a clean, smooth trench with just one pass.
