

Leading vendors of network monitoring tools have fully integrated the software-defined POLATIS optical circuit switches into their system, creating an automated mass cybersurveillance solution.

Explore GEZHI's 48\*2x4 Optical Switch Matrix. Ideal for FITL, Automatic Measurement, and Network Monitoring.

BL167GM-SFP is a managed industrial Ethernet switch with 2 Gigabit SFP and 4 Gigabit RJ45 ports. It is ideal for automation, transportation, and surveillance.

This 2x4 type optical switch has low insertion loss, low driving power, compact size, and fast switching speed. The switch is designed for use in optical fiber communication networks and measurement ...

Unlike packet switches, which are optical-electrical- optical (OEO) switches, signals are not retimed in optical circuit switches allowing users the ability to mimic and troubleshoot real time network ...

In order to meet the different requirements of industrial applications, this series adopts a modular design, up to 2 Gigabit optical fiber ports and 4 Gigabit Ethernet electrical ports, which enhances the ...

The switch consists of two ports that selectively transmits, redirects, or blocks optical power in a fiber optic transmission line. The optical switch must be actuated to select or change between two states.

The SwitchLight™ is a patented optical switching platform designed for network monitoring and test tool sharing applications. Users can easily route selected signals or wavelengths to a 3rd party test ...

BL167GM-SFP is a managed industrial Ethernet switch with 2 Gigabit SFP and 4 ...

A simple method to verify the SWITCH is to connect different input signals to the input ports of the SWITCH; by monitoring the routing control of the SWITCH, corresponding outputs are received.

The N7731C offers two independent 1x4 optical switches, ideal to connect up to four devices to a test setup, or to share up to four measurement instruments with the same device under test.
