

Optical Protection Switch

The OS-4121 is an optical path protection switch, providing a self healing network. This optic switch detects loss of optical power in the primary optical path and automatically switches to the secondary ...

Protection Switches for Fiber Optic Data Networks. The optical protection switches of the Polatis 6000 pss series guarantee maximum security, minimum downtimes, and optimum data security for critical ...

GLSUN offers OLP optical line protection series products can be used to protect the network transmission line and realize optical power monitoring and automatic switching.

MEISU fiber optical switch is an ideal optical component for OADM, OXC, system monitoring, and optical line protection. They can be integrated into an optical network for switching optical transmission ...

Our net-ready OLPs offer various reliable protection schemes against fiber cuts and network failures. Our OLP is also compatible with 1310/1550 transmission in the opposite direction in the same fiber. ...

There are different types of optical line protection devices for network protection. The most commonly used OLP are OLP 1:1 and OLP 1+1. Both of them require a spare fiber optic path. But they use ...

FS optical line protection switch features 1+1 backup and less than 15 ms fast switch to the standby fiber link that ensures business uninterrupted when malfunction occurs.

The FRM220-OPS51M is a Multi-mode Fiber Optical Protection Switch that is able to provide Multi-mode fiber path redundancy on a channel by channel basis. This unit is particularly well suited for ...

OLP (Optical Line Protection) is a device used in pairs, one at each end of the optical signal to protect network transmission line. Designed for maximum configuration flexibility, this module can plug ...

The 7707BPX is a wide band 2 x 1 optical protection switch that provides auto-changeover functionality by detecting changes in the optical input power level. The 7707BPX has integrated technology for ...
