

Kyria provides manual optical switches (SM or PM fiber), or piloted PM switches based on magneto-optical elements. Kyria switches can be customized according to our customer's needs or provided ...

Finally, there's some tricky new gear that uses optical sensors to detect an arc. The photocells trip the mains and clear the fault. I don't know if ETAP or SKM include models of these, ...

Based on optical micro-electro-mechanic systems (MEMS) technology, those switches use tiny mirrors to guide the light to the desired output. MEMS based optical switches offer outstanding durability, ...

With the SKMN-8S-P, all data relays are controlled by inverted signals, shielding connections from outside intrusion by forcing them each to work one at a time. Each port uses its own isolated data ...

The Scenario Manager is used to create and switch between multiple scenarios. When changes are made in the base project, you can selectively promote the changes to all of the scenario projects.

Optical switches are commonly used in optical add/drop applications that need to be reconfigurable. They are also used for network switching applications for fault protection. Optosun's opto-mechanical ...

Kyria provides manual optical switches (SM or PM fiber), or piloted PM switches ...

In this paper, we will discuss the importance of becoming familiar with two new powerful options available for arc flash incident calculations in the SKM Arc Flash module V7.0.

How can I use the Differential Function in PTW? The Protective Device Function in PTW v6.5 has new features for modeling additional functions such as differential, that can be utilized in Arc Flash ...

SKM is the leader in power systems analysis and design software for fault calculations, load flow, coordination, arc flash hazards, motor starting, transient stability, reliability, harmonics, grounding, ...

There are three fundamental objectives to overcurrent coordination that engineers should keep in mind while selecting and setting protective devices. o The first objective is life safety.
