

Price List for Smart Pluggable Optical Modules for Data Center Interconnection

The solution simplifies transport between data centers by replacing stand-alone optical transponders with the Cisco ® portfolio of standardized coherent pluggable modules, which can be ...

With the development of Internet services, the construction of cloud infrastructure, and the need for AI computing, telecom, and data center operators have put forward clear requirements for the ...

Get the highest quality, performance-leading optical transceivers for any network architecture. Find the transceiver model to fit your network.

Huawei provides a full series of pluggable optical modules. A wide variety of modules give you flexible plug-and-play options for all types of interfaces.

Explore the complete line of Ethernet and InfiniBand interconnects, offering 40/56/100/200/400/800G infrastructures for AI and accelerated computing. With super-high density and backwards ...

GIGALIGHT provides 100G, 200G, and 400G pluggable digital coherent optical transceiver modules (DCO) for data center interconnection (DCI), 5G backhaul, metro telecommunication, and other long ...

Get the pluggable module performance you need from the manufacturer of choice for all major networking equipment vendors worldwide.

Fiber Optic Transceiver Modules Fiber optic transceiver modules are fiber cable adaptive housings that contain a light source for transmitting data via fiber optic cable as well as a photodiode for receiving ...

Optical Transceiver Modules/SFP, also called fiber optic transceiver or optical transceiver, is a typically hot-pluggable device used in high-bandwidth data communications applications.

Marvell offers a portfolio of DCI modules designed to efficiently transmit data over regional fiber networks.
