

Railway Fireproof Special Distribution Box

Railway applications can be challenging - but nVent helps train run on time... and safely. Our electronics enclosures and related products withstand harsh environmental conditions while providing easy ...

Bison ProFab is a leading provider of standard and custom electrical enclosures, traffic cabinets, and specialty enclosures for the rail industry.

Fire protected boxes are used as Junction Boxes for supplying power to functional integrity circuits in the tunnel, keeping connectivity in case of fire, commonly for ventilation and lighting.

We design and manufacture custom electrical enclosures for the railway and tunnel sector, ensuring safety, reliability and long-term performance in the harshest environments.

In subway systems, the distribution box must be fire-resistant and moisture-proof. Compact switchgear like the HXGN17-12 is used to power massive ventilation fans and emergency lighting systems, ...

690V 500A Terminal Block Distribution Box, Fireproof, Heat Resistant DIN Rail Terminal Block, Single Pole Rail Power Junction Box for Power Distribution Cabinets (Blue)

The distribution branches are configured with NB1-63H/2 series DC miniature circuit breakers to meet the needs of fine multi-circuit power distribution. It also integrates the NXU-IIG surge protector to ...

Its larger storage capacity makes it ideal for complex railway systems. Designed for trackside, industrial, and outdoor use, it can be mounted on poles, walls, or concrete foundations for versatile installation.

Fire-Resistant Junction Boxes. Customer focused design for all applications and environments. Known for ease of installation and service.

Includes expanding fire cushion to prevent fire from spreading to walls Fire cushion expands when the temperature rises as a result of fire. The expansion of the material in the event of fire seals the box, ...
