

Relay Protection Seminar

Jim Phillips, P.E. will show you how to work with protective relays and determine optimal settings for protection and coordination in this first part of a two part class.

Relay Testing and Commissioning Basic is an interactive seminar designed to teach beginner relay technicians the basics of protective relay testing and protection system commissioning.

This webinar is for engineers, technicians, and newcomers in the field of protection, as well as anyone seeking a solid foundation in relay protection for distribution and transmission grids.

Do you find protective relay testing frustrating? Our 24/7/365 online protective relay training is designed to help you master relay testing!

The Hands-On Relay School is a professional development short course that trains protective relay technicians, electrical/power plant technicians, engineers, and protective relay test specialists.

Join leading authorities with expertise across power systems to learn about increasing safety, cybersecurity, communication, protection and control, plus so much more. With 13 sessions to ...

This instructor-led training focuses on how protective relays are applied, coordinated, and tested in real electrical systems, using practical examples rather than theory-only explanations.

Participants will learn the basics of generator protection combined with hands-on training using actual relays. Laboratory exercises will cover proper relay maintenance, specific test procedures, and ...

PROT 401 provides an overview of the principles and schemes for protecting power lines, transformers, buses, generators, and motors. The course provides basic guidelines for relay application and ...

This hands-on course covers the concepts and characteristics of various protection schemes used for high voltage transmission lines and relays.
