

There are many types of protective relay functions, but this presentation will focus on the most common type, basic overcurrent device 50/51 (instantaneous and time overcurrent).

Protection relay is an electromechanical monitoring safety device which senses fault and provide trip signal to the breaker as per set value in LT and HT panel.

Types of protection relays are mainly based on their characteristic, logic, on actuating parameter and operation mechanism. Protective relays can be categorized based on their operating ...

Protection relays in a Main Distribution Board (MDB) are central to selective coordination, fault discrimination, and asset protection across incoming and outgoing feeders.

Protective relays and devices have been developed over 100 years ago to provide "lastline" of defense for the electrical systems. They are intended to quickly identify a fault and isolate it so the balance of ...
