

Selling optical detector modules

Detectors used in optics and photonics applications are available at Edmund Optics

Interested in how Single Photon Detection has evolved over the years and into today's turn-key modules that provide simple, plug-and-run photon detection for OEMs and laboratories alike?

It is available in single-mode fiber or free space coupling and SMA connector output. It is mainly used in fiber laser Testing, photoelectric detection system, oscilloscope front photoelectric converter and ...

We offer unmounted photodiodes as well as amplified, biased, and avalanche photodetectors. Thermal power detectors are available unmounted, mounted on a PCB, or mounted on an aluminum plate. ...

Utilizing our 40 years of experience in optoelectronics, Marktech's detector customization process focuses on customer needs and applications. Instead of using standardized-but perhaps non ...

Shop DigiKey's large in-stock selection of Sensors, Transducers. View inventory, pricing and order now for same day shipping!

Buy and sell, new and used Optical Detectors and Power Meters on LabX. Browse LabX classified ads and auctions today to find the best price on a wide selection of Optics and Photonics Equipment.

Meskernel offers a full range of high-performance optical detectors and receiver modules designed for Precision Measurement, scientific imaging, and laser-based sensing systems.

OSI Laser Diode manufactures advanced optoelectronics products designed for the telecommunications, data communications, broadband access, industrial, aerospace, test and measurement, medical and ...

Mouser offers inventory, pricing, & datasheets for Optical Sensor Modules.
