

Silicon carbide rod distribution box

Peruse our extensive collection of silicon carbide rod distribution box to narrow down your selection for the perfect fit.

SiC heating elements are resistive heaters made from recrystallized silicon carbide. They are self-supporting rods or shapes with a high-emissivity hot zone and low-resistance cold ends for power ...

American Elements" Silicon Carbide Rods are extremely strong cylindrical shapes formed from reaction-bonded silicon carbide for use in high-temperature applications.

Global#174; SD silicon carbide heating elements are designed for use in high ...

Hexoloy#174; sintered silicon carbide rods are available in SA and SE grades. Larger diameters are available in SA grade. Saint-Gobain Performance Ceramics & Refractories" team of experts is on ...

The Alpha Rod elements are tubes with thick walls and are made from high ...

The Alpha Rod elements are tubes with thick walls and are made from high resistance silicon carbide (heaters) elements. The element tubes consist of a central heating section referred to as a hot zone ...

Global#174; SD silicon carbide heating elements are designed for use in high-temperature furnaces, operating up to 1,600#176;C (2,910#176;F). These elements are available in both single-rod and multi-leg ...

Silicon Carbide Box Furnace Series 3410/3420 Furnaces. Capable of operating temperatures up to 2800#176;F (1540#176; C), this Series has been designed for slow and steady heat up rates with

Global#174; SD (SiC) elements are manufactured in recrystallized alpha silicon carbide, and have been designed to maximize performance in the widest range of high temperature equipment.

Remove material and leave a smooth, uniform finish inside cylinders. Choose from our selection of silicon carbide, including over 500 products in a wide range of styles and sizes. Same and Next Day ...

AGRM supplies silicon carbide rod heating elements for high-temperature furnaces, offering excellent oxidation resistance, fast heating and long service life for industrial kilns and heat treatment equipment.
