

Spanish Liquid-Cooled Switch 200G

The liquid is circulated through liquid-cooled servers, and the heat is radiated from the liquid through an external heat exchanger to the room. The room air-cooling infrastructure is utilized to remove the ...

NADDOD's 800G/400G/200G immersion cooling transceivers, featuring advanced sealing technology and compatibility with industry-standard fluids, deliver efficient heat dissipation and reliable data ...

Explore the FS N8510-24CD8D, a future-ready 200G data center switch built for high-density, scalable, and lossless networking. This guide covers specifications, ...

Powerful Management Features a variety of flexible management options including a web-based UI, industry-standard CLI, SNMP, and a dedicated RJ-45 console port DIS-200G Series

The leaf-spine architecture network, designed with 400G QSFP-DD switches and 100G/400G optical modules, meets the requirements of high bandwidth, low latency, low convergence, and low power ...

High-density 200GE/100GE switches featuring high buffer and millions of routing entries. A single chassis provides up to 144x 100GE ports or 72x 200GE ports, supporting flexible port configuration ...

Take steps now to modernize your facility and thermal management strategies for tomorrow's liquid-cooled switches. Meet with your Cisco team or partner to discuss how to design, ...

Explore the FS N8510-24CD8D, a future-ready 200G data center switch built for high-density, scalable, and lossless networking. This guide covers specifications, module and cable compatibility, ...

Strong anti-leakage performance and a low leakage rate. Compatible with a variety of mainstream cooling fluids. Provides connectivity solutions for 200G immersion cooling NICs to 200G air-cooled ...

FS 100/200G PicOS® switches offer high speeds and port densities to meet the network deployment requirements of various scenarios, including core layer applications, and the evolving requirements ...

The Q3450-LD liquid-cooling system features two parallel cooling loops operating concurrently. Liquid enters via two separate inlet ports and exits through two outlet ports.
