

Sudan Hot-swappable Power Distribution Unit IP54

HDT's Power Distribution Units (PDUs) allow a user to hot swap a generator for actions which may be needed on another generator, such as an oil change or filter change, requiring shutting down the ...

All switches ship with a blank cover in the second power supply slot. The main module is field replaceable and the redundant module is hot-swappable. The redundant power supply can also ...

The key component of the hot-swappable design is a modular power distribution unit (PDU) that combines all input and output power connections with a manual bypass switch.

Intelligent and efficient network power protection from entry level to scaleable runtime. Ideal UPS for servers, point-of-sale, routers, switches, hubs and other network devices.

Engineered for mission-critical environments, the FlexiPower series delivers scalable, hot-swappable modular protection with N+X redundancy and IP54 enclosures.

Quality Sudan power strips, in stock, for standard duty applications up to industrial applications. Versions designed for PDU power distribution purposes in data centers and server room applications.

Meet daily power distribution needs effortlessly, allowing devices to stay powered from UPS systems, generators, or direct mains supply. Specializes in precise input power monitoring, providing ...

All switches ship with a blank cover in the second power supply slot. The main module is field replaceable and the redundant module is hot ...

Optimize industrial power systems with hot-swap controllers that enable safe live insertion and removal of boards without disrupting operation. They manage inrush current, protect against electrical faults, ...

Each Metered PDU has a digital LCD meter for real-time load monitoring. Series features include durable metal housing, horizontal/vertical mounting, switch-free design, network-grade plugs and ...

ST offers a family of hot-swap power management ICs (E-fuses) for the supply of low-voltage appliances and their protection from overvoltage and overcurrent events.
