

TFR7800BX optical receiver

Optical mini-receiver for small MDU (Multi Dwelling Unit); receives one optical signal in the 1200 nm-1600 nm range and restores it on one RF output (47 MHz-1220 MHz) with amplification. Equipped ...

Overview TFR7800Bx FTTH optical receiver adopts great response and low noise photoelectric detector and low noise amplification circuit. It has excellent nonlinear index for Both analog and digital TV.

TFR7800 FTTB optical receiver is one-way optical receiver with one or two output port. It can be used in the CATV network, digital network and telecom network, especially for fiber to building ...

TFR7800Bx domestic optical receiver can be used in the CATV network, digital network and telecom network. Especially in fiber to building. its optical power range is - 8~ +2DBM.

The FT-HHRX-1000-SC-MINI optical receiver can be used for CATV networks, digital networks and telecommunication networks in the 47-1000 MHz range. The FT-HHRX-1000-SC-MINI input optical ...

TFR7800 FTTB optical receiver can be used for CATV network & comma; digital network and telecommunication network & period; It especially suitable for the FTTX network which the fiber ...

TFR7800Bx FTTH optical receiver can be used for CATV network, digital network and telecommunication network. It is especially suitable for the FTTH network which the fiber extended to ...

Broadband receiver for down and upstream in HFC and RFoG networks.

TFR7800Bx FTTH optical receiver can be used for CATV network, digital network ...

This device is an HFC return path transmitter and RF optical receiver for use in fiber to the home applications. This unit has 45-870MHz RF outputs for digital TV as well as an optional optical ...

TFR7800Bx FTTH optical receiver adopts great response and low noise photoelectric detector and low noise amplification ...

TFR7800BX optical receiver
