

Transimpedance Amplifier 200G from Indonesia Overseas Warehouse

The MATA-05819B Linear TIA is intended for 50G, 100G, 200G and 400G receivers using multilevel modulation such as PAM4. The TIA provides linear, low noise amplification from 0.1 to 3mA, and has ...

Mouser offers inventory, pricing, & datasheets for Transimpedance Amplifiers.

The DLPCA-200 is an adjustable transimpedance amplifier for measuring very small currents with bandwidths in the kHz range. It is a highly versatile amplifier with a wide dynamic range.

Shop DigiKey's large in-stock selection of Instrumentation, Op Amps, Buffer Amps. View inventory, pricing and order now for same day shipping!

A key component of such links is the wide-bandwidth and high-linearity coherent optical receiver. In this paper, we present a fully differential (FD) optical receiver architecture consisting of a ...

Mouser is an authorized distributor for transimpedance amplifier manufacturers including Analog Devices, Texas Instruments & more. Please view our selection of transimpedance amplifiers below

Powering the fastest networks on the planet: Marvell's transimpedance amplifiers (TIAs) ushered in the era of 100G and 200G networking and continues its market leadership with 400G, 800G, and beyond.

Analog Devices' optical and logarithmic transimpedance amplifiers (TIAs) offer high performance, single-chip solutions for precise photodiode current-to-voltage conversion.

The IN2865TA is a Quad-channel, single-ended input, linear transimpedance/variable gain amplifier (TIA/VGA) for 200G and 400G optical receivers. The device features an automatic gain mode.

Our high-bandwidth transimpedance amplifier (TIA) portfolio includes devices with variable gain settings, fast recovery time, internal input protection and fully differential outputs that are optimized for a wide ...
