

# Two interfaces of Huawei optical module

This article summarizes several solutions for using optical modules with switches and common problems encountered during usage, along with specific solutions.

Learn how a field team validated a Huawei CloudEngine transceiver for leaf-spine upgrades, with specs, compatibility checks, and troubleshooting steps.

Board Type With the cross-connect matrix unit as core, the OptiX OSN 3500 consists of interface unit, SDH cross-connect matrix unit, synchronous timing unit, SCC ...

Unlike optical modules, copper modules do not perform electrical-optical conversion. When two optical interfaces have copper modules installed, the interfaces can be connected using a copper cable.

The optical modules used on both ends must have the same transmission speed, and the interface configurations on both ends must comply with related protocols. The type of optical ...

2.1.7.1 Q What is the impact the use of non Huawei certified optical switch module is? When authentication Huawei optical module, the optical module of a comprehensive verification function, ...

OMXD30000 SFP+ is a 10 Gigabit optical module with DOM function, and the center wavelength is 850 nm, and the interface type is LC duplex. The optical transceiver module (SFP GBIC XFP) is ...

If an optical module is installed in a running device, you can run the display interface transceiver command to view parameters of the optical module, including the center wavelength, transmission ...

Board Type With the cross-connect matrix unit as core, the OptiX OSN 3500 consists of interface unit, SDH cross-connect matrix unit, synchronous timing unit, SCC unit, overhead processing unit and ...

Execute the command "combo enable fiber" in interface mode to switch to the optical interface; on the contrary, "undo combo enable fiber" ...

Execute the command "combo enable fiber" in interface mode to switch to the optical interface; on the contrary, "undo combo enable fiber" switches to the default electrical interface state.

When two optical interfaces have copper modules installed, the interfaces can be connected using a copper cable. Currently, Huawei offers only GE copper modules with RJ45 interfaces.
