

UPS Double-Layer Distribution Box

Double the protection of a 200 lb. test box. Protects valuable, fragile or your heaviest items. Use when extra stacking strength is needed. UPS recommended weight capacity up to 80 lbs.

Combining up to 24 separately protected, ready-made circuits in an output distribution unit built into a parallel switch panel, the PDB eliminates the need to set up a sub-distribution system.

Choose a UPS distribution box that supports modular expansion--either through additional battery packs for extended runtime or increased load capacity via parallel configurations.

Browse power distribution boxes with circuit breaker protection and multiple outlet configurations. Shop durable solutions for construction and emergency use.

The UPS output PDC is used for important load devices in the equipment room. It is an essential product in the computer room. It works closely with UPS and can be customized in size. It can also be made ...
